I'm a Visual Designer with 12+ years of experience. I worked in different fields, from advertising to corporate brochures, to digital banners and web design but I also enjoy crafting and using my hands instead of computers. I took a break to grow in a very different field (sewing patterns) where I made sewing patterns for the home seamstress and created a website to sell them, I went exploring the world, illustrated a series of children's books, and more recently I started a YouTube channel with crafting tutorials focused on sewing clothes. Now I'm looking for new challenges and for the opportunity to learn new things.
